A Statewide or Countywide (depending on the jurisdictions) criminal record check is performed to capture all misdemeanor and felony convictions in that jurisdiction. Utilizing the “Smart Check” the search is conducted in the jurisdictions with the longest and most current residency.

**For example:**

In Virginia, the "Smart Check" would be a *Statewide* search for all Felony and Misdemeanor convictions within the State of Virginia.

In Michigan, the “Smart Check” would be a *Countywide* search. The county searched would be the longest and most current residency reflected on the address trace.
